

HOSPICE HURONIA NEEDS ANOTHER \$1 MILLION TO BUILD PENETANGUISHENE RESIDENTIAL HOSPICE

Hospice Huronia is nearly halfway to its fundraising goal, but time is of the essence for the local charity to collect the funds necessary to build a new five-bed residential hospice.

In the fall of 2017, the province announced a new program to support the creation of new and expanded hospices across Ontario. This funding will help with the construction or renovation costs of more than 190 beds.

Hospice Huronia is hoping to capitalize on this opportunity, collect provincial funding and make its dream of building a local residence a reality.

After four and a half months of aggressive fundraising, the charity has raised \$1 million. They are now eligible for capital funding from the province and expect to receive \$200,000 per bed for each of the five beds, fuelling the project with another \$1 million.

This funding is contingent on Hospice Huronia raising the rest of the necessary operating funds and getting the facility operational by March 2019. They need another \$1.3 million.
